

Quantum Hot and Cold Tall Point of Use Water Coolers

The Engineering of Premium Quality Water

Quantum Tall Point of Use Coolers and conversion kits are so flexible; you can convert an existing bottled water cooler in minutes or add additional water care components to an existing installation, in order to meet site specific needs.

Exceptional Simplicity

- Quantum Systems are built “filter-ready”. All components are factory-installed for you
- Quantum Systems ARE easy to install and service using John Guest quick connect/disconnect fittings
- Service accessibility and filter maintenance is done in minutes, standing up. Everything is at eye level!
- Upgrade the “Filter Tree” with additional filtration components using nothing more than a screwdriver
- Dependability – our double float system ensures unlimited water at your finger tips
- **Seven year warranty on the sealed refrigeration, one year on all remaining parts**

Features

- Extra large 2 litre “cold” and 1 litre “hot” water tank capacity
- Child proof lock on Hot faucet
- Uses only 18” post-filter tubing length to reservoir to minimize contamination
- 33% more capacity than traditional coolers
- High flow faucets provide fast servings
- Plug-and-play design. Filter installed in fixed location for convenient service
- Removable reservoir makes sanitizing quick and easy
- Factory-installed and tested to give you peace of mind
- Easy cartridge change, simply lift off the cover, twist out the cartridge and snap in a new one
- One universal cup dispenser, which loads from the top or the bottom
- 58 ¼” tall – weighs 35 lbs.
